Certification of Compliance

Regarding the classification of “ Batteries, Wet, Non-Spillable, Electric Storage “, We hereby certify that batteries produced by **Kung Long Batteries Ind. Co., Ltd.** are Sealed Valve Regulated Lead Acid batteries (VRLA) with Absorbed Glass Mat (AGM). Our batteries meet the requirements of 49 CFR 173.159(D) and Special Provision A67.

The international transportation of wet and moist charged (moist active) batteries is regulated by the International Maritime Dangerous Goods code (IMDG).

Some Kung Long Batteries have been tested and meet the non-spillable criteria listed in the IMDG code page 8121. These batteries are excepted from all IMDG code provided that the batteries terminal are protected against short circuits(**IMDG/Ocean – See SP238-2**). Thus our batteries can be classified as non-spillable batteries and don't require additional dot hazard labels.

Kung Long Batteries' VRLA batteries have been tested and meet the non-spillable criteria listed in IMDG Code Special Provision 238 .1 and .2 as NON DG ;therefore, are not subject to the provisions of the IMDG Code provided that the battery terminals are protected against short circuits when packaged for transport.
